Google Inc. applauds the student scientists who achieve academic excellence and the Computer Science departments that motivate them. To acknowledge the efforts of these students and their schools, Google Inc. is pleased to offer the Google Student Scholarship Program. Under this program, Google awards cash or scholarship prizes to eligible students and their nominating department, as explained below.

To qualify, for this program, an undergraduate or graduate student must be on track to graduate with a GPA of 3.80 or above in Computer Science or Computer Engineering/Software Engineering by June 2002. In addition to an excellent academic record, we will consider other outstanding achievement such as significant contributions to the Open Source community, unique projects, or exceptional teaching skills. Students will be evaluated relative to their peer group, i.e., a BSCS student will not be directly compared to a MScS or Ph.D. student.

Applications must include:

1. A nominating letter from CS the department confirming that the student is expected to graduate by June 2002.
2. A resume that includes the name, address, home phone and e-mail of the student as well as the expected graduation date and anticipated degree.
3. A current official transcript. If sent separately, please include an unofficial copy with the application.
4. At least two letters of recommendation.
5. Any other information that supports the student’s nomination.

Google’s top scientists will evaluate all applications received and will, in their sole discretion, award the following three prizes in early 2001:

- **First Prize:** $10,000 to student and $10,000 to CS dept.
- **Second Prize:** $7,500 to student and $7,500 to CS Dept.
- **Third Prize:** $5,000 to student and $5,000 to CS Dept.

Although there is no formal submission limit, we encourage departments to limit the number of submissions to no more than five per department. Completed application packets must be post-marked or received by December 15, 2001 and sent to:
